**INVENTION DISCLOSURE FORM**

(To be filled up by the Inventor)

**Disclosure Form for Salient Features for a new Patent application**

1. Title of the invention:
2. Name and address of the applicant and inventors:
3. Field of industry to which the invention relates including possible areas of application:
4. Prior Knowledge (If any patent in the field is known and what is known in non-patent literature):
5. Drawbacks connected with hitherto known Processes/devices (Discuss the drawbacks of the prior knowledge given in 4 above the inventor seek to remove):
6. The main objective of the invention:
7. Other objectives, if any:
8. The main finding (The principle underlying the invention) together with working principle:
9. The new result obtained from the new finding. Inventive merit should be substantiated to define in quantitative terms the new results, which the invention alone can achieve (what is it which the inventors have done which the others have not done)?
10. Other new findings, if any:

11. Details of invention (Novel feature that you would like to protect):

Please insert diagrams where applicable for explaining the details.

The features that we would like to protect are:

(List the main elements which are common to the new and old processes/devices; as well as their functional relationship. Define the new combination):

12. Further novel features, if any:

13. Detailed description with reference to drawings, if any.

The main aspects of this device/process/material:

14. Examples to establish improved results. Comparative examples would further help to establish the improvements:

15. What are the main advantages of the invention?

16. Search Report if any.
