### Rules:

1. Students must choose one of two options for their projects: a modest application-based project that must be finished in six months without fail. The other option is major research-based work which can be carried over to the next semester.
2. The students must fix the topic of the project in consultation with the guide latest by 14<sup>th</sup> August, 2023 and communicate the same to the Project In-Charge
3. Each student must prepare a synopsis that includes an abstract, problem statement, aims and objectives, initial literature review, the proposed methodology or expected outcome by the end of August, 2023.
4. Research-based projects must produce at least one research paper in a conference/ journal / book chapter
5. Students who opt for application-based projects must submit the software/ tool built by the end of the semester.
- 6. 10 Marks will be given to authors of published papers, patent, and book chapters.**
7. In each semester, there will be two reviews. Students must create a PowerPoint presentation and submit one consent letter from their Guide. It should be noted that the student will not be permitted to appear in the evaluation without the consent letter.
8. Every project guide must keep a record of the discussion / participation of their student group. The format for this will be shared by the Project In-Charge.
9. At the end of the project, students must submit a report on it without fail. The format for this will be shared by the Project In-Charge.
- 10. The project synopsis and the report must have plagiarism level less than 15% . This will be verified by the software which is recommended by the university.**
